Alondra Flores

Web Developer

About Me

Hello, I am Alondra, I am an insightful and intuitive person with a solid ability to make effective decisions in situations of high difficulty. My focus on responsibility and attention to detail is reflected in my work and my attitude towards the tasks I undertake. My ability to master several languages, including English and Spanish, allows me to communicate effectively in international and multicultural contexts.

I am committed to excellence in my work and am constantly looking for opportunities to learn and grow in my field.

Education

○ **Professional in Information Technology and Comunication** from Instituto Tecnológico de Pachuca
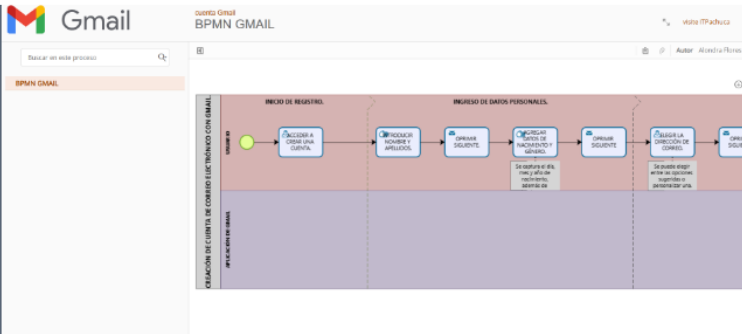

2020 - Present

I acquired a solid foundation for the planning, implementation and management of ICT systems, this training has prepared me to provide solutions in business environments and contribute to the success of projects that require a solid understanding of ICT.

○ **Technician in Administrative Managment Proyects** from CECyTE

2015 - 2018

I have acquired a solid foundation of knowledge and skills essential for effectively contributing to the administration and operation of organizations. My training and experience include document management, efficient creation and organization of business records, and the use of document management software. I've developed competencies in planning and executing administrative processes, such as inventory control, human resources management, and schedule coordination.
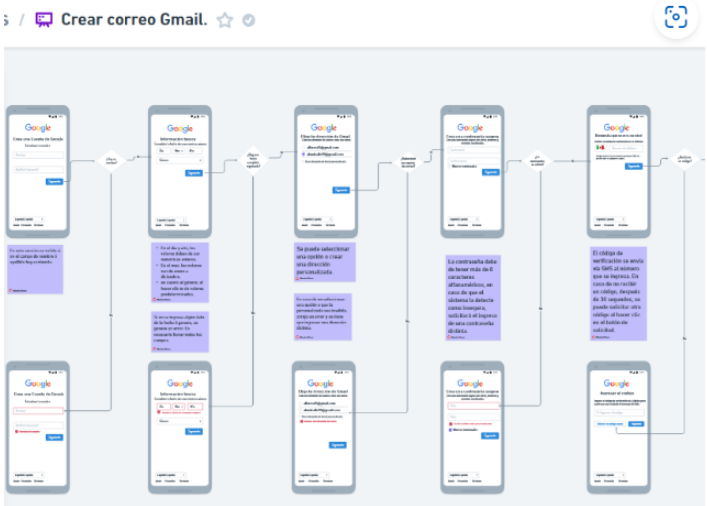

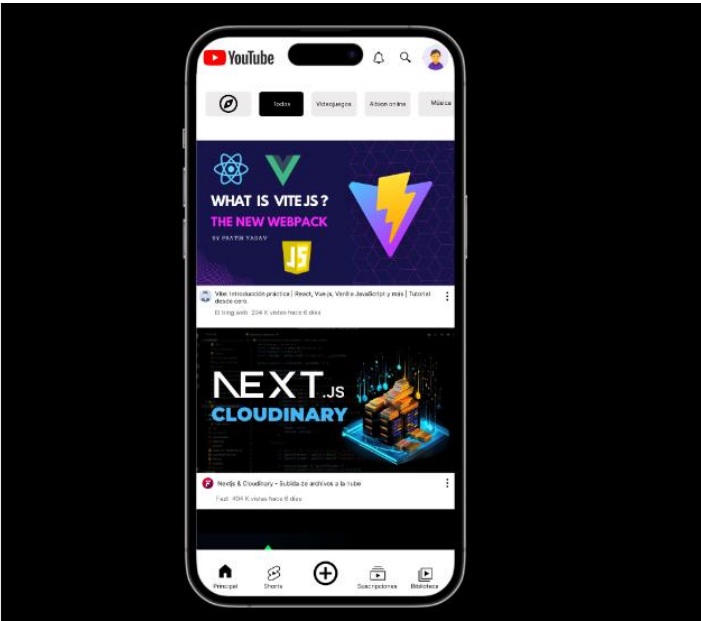

Portfolio

Business Process Model and Notation

Create a BPMN diagram that represents the steps required to establish an email account.

FIGMA / SVG GOBBLER

Prototyping of Mockup Applications

This project involves prototyping a YouTube-like app in simulation form. The user interface has been designed to simulate the experience of browsing and watching videos.

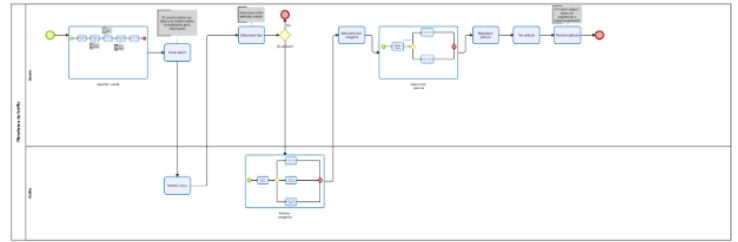

Whimsical / SVG GOBBLER
